# 1. INTRODUCTION

## 1.1. Background<sup>1</sup>

The Extractive Industries Transparency Initiative (EITI) is a global Standard to promote the open and accountable management of natural resources. It seeks to strengthen government and company systems, inform public debates, and enhance trust. In each implementing country, it is supported by a Multi-Stakeholder Group (MSG) comprising government representatives, extractive company officials and civil society organisations working together. EITI is currently being implemented in 57 countries in Africa, Asia, Europe and the Americas.

The EITI Standard sets out the requirements which countries need to meet to be recognised, first as EITI Candidates and subsequently as EITI Compliant countries. The Standard is overseen by the EITI Board, which comprises 20 members representing implementing countries, supporting countries, civil society organisations, and industry and institutional investors.

The 43rd EITI Board meeting held in Paris on 17 June 2019 adopted the 2019 EITI Standard, which became applicable from 1 January 2020. It is the sixth version since the EITI Principles were agreed in 2003.

The 2019 EITI Standard can be found at the following link:

([https://eiti.org/files/documents/eiti\\_standard2019\\_a4\\_en.pdf](https://eiti.org/files/documents/eiti_standard2019_a4_en.pdf)).

It encourages countries to make use of existing reporting systems for EITI data collection and make the results transparent at source. The 2019 Standard introduced new aspects on environmental, social, and gender impacts. It also breaks ground for the disclosure of the identity of the real owners - the 'beneficial owners' - of the companies that have obtained rights to extract oil, gas and minerals in implementing countries starting from 2020.

## 1.2. EITI in Uganda<sup>2</sup>

Uganda was admitted to the EITI, in August 2020, as a candidate country. The basis of Uganda's admission was the submission of a candidacy application<sup>3</sup>, which detailed the country's statement of intent for improving the governance of its extractive sector as documented in the Uganda EITI National Work-plan 2020 - 2022<sup>4</sup>, which had three objectives:

- to enhance transparency in the extractives sector in order to promote good governance and accountability in the management of extractive revenues;
- to strengthen revenue management and accountability with a view to ensuring effective collection, optimisation and allocation of revenues; and
- to build the operational and technical capacity of the Multi-Stakeholder Group (MSG) and the Secretariat to ensure that EITI is effectively implemented.

EITI implementation in Uganda is overseen by a tripartite MSG comprising twenty-five members as follows: five representatives from civil society organisations, seven from extractive companies and

<sup>2</sup> <http://www.ugeiti.org/>

<sup>3</sup> <https://eiti.org/document/uganda-eiti-candidature-application>

<sup>4</sup> <https://eiti.org/document/ugeiti-20202022-work-plan>

thirteen from the Government. The UGEITI MSG is supported by a Secretariat (UGEITI) which oversees EITI implementation on a day to day basis.

Uganda produced her first report in May 2022. The second report is due in June 2023. Uganda will undergo validation beginning October 2023.

## 2. EXECUTIVE SUMMARY

### 2.1. Objective of the report

The objective of this report is to define the scope of the UGEITI Report for the FY 2020-21 which will be submitted to the UGEITI MSG for approval. The scoping report involves:

- defining the tax reporting period;
- determining material revenue streams from each extractive sector (oil, gas and mining);
- deciding which extractive companies and Government Agencies would be included in the process;
- preparing the reporting templates to be used by reporting entities;
- proposing procedures to ensure credibility of the data submitted by reporting entities; and
- defining the schedule of the reporting process.

The Multi-Stakeholder Group (MSG) is tasked with approving the materiality threshold, the reporting scope as well as the reporting template format in accordance with Requirements of the EITI Standard.

### 2.2. Scope of work

We have carried out a preliminary analysis of the extractive sector in Uganda in accordance with the Terms of Reference for the purpose of confirming the scope of the EITI reporting process and the data collection procedures for publishing the UGEITI Report for FY 2020-21. This scoping report defines the reporting scope of the second UGEITI report.

Our findings and proposed reporting scope are set out in the relevant sections of our report, which is prepared solely for the UGEITI MSG in order to assist it in defining the scope of the UGEITI report for FY 2020-21.

### 2.3. Key conclusions

This summary sets out the main conclusions of our scoping analysis:

- (i) we were able to determine the key government agencies responsible for the collection of extractive sector revenues as set out in Section 4.3 of this report;
- (ii) based on information made available by the Directorate of Petroleum, PAU and UNOC, there were no operational activities (production) in the oil and gas sector during the fiscal year 2020-21;
- (iii) with regards to the oil and gas sector, we recommend including in the reconciliation scope the oil and gas companies that are still based in the country and which held active licenses in the fiscal year 2020-21 without considering any materiality threshold. Uganda National Oil Company (UNOC) holds 15%<sup>5</sup> participating interest as the Government's nominee in the Petroleum Production Licenses and confirmed that it did not make payments to any government agency in the upstream sector. We recommend therefore including four (4) oil and gas companies as follows:

---

<sup>5</sup> Source : Data received from Uganda National Oil Company (UNOC).

**Table 1: List of oil and gas entities retained in the reconciliation scope<sup>6</sup>**

N°	TIN	Name of Petroleum Company(ies)	Reconciliation scope
1	1000171284	TOTAL ENERGIES E&P UGANDA B.V.	✓
2	1000491360	CNOOC UGANDA LTD	✓
3	1013866034	ARMOUR ENERGY LTD	✓
4	1013940113	ORANTO PETROLEUM LTD	✓

Tullow Uganda Ltd sold its assets in Uganda to Total Energies E&P Uganda B. V effective 1 January 2020, and the deal was completed on 10 November 2020. Tullow has therefore been excluded from the reconciliation scope. We recommend a unilateral disclosure of its payments through Government Entities in accordance with EITI Requirement 4.1.d.

- (iv) Based on the materiality approach detailed in Section 4.4.2 of this report, we identified 7 mining companies which contributed 95.76% of total revenues from the extractive sector before reconciliation as detailed in Table 2 below.

**Table 2: Summary of materiality analysis**

Thresholds	Number of entities	Total receipts for FY 2020-21	Total %	Cumulative number of entities	Cumulative %
Threshold > UGX 200 billion	1	273,032,167,053	55.91%	1	55.91%
UGX 200 billion > threshold > UGX 30 billion	2	125,851,236,255	25.77%	3	81.67%
UGX 30 billion > threshold > UGX 15 billion	2	44,231,516,019	9.06%	5	90.73%
UGX 15 billion > threshold > UGX 12 billion	2	24,570,575,579	5.03%	7	95.76%
UGX 12 billion > threshold > UGX 1 billion	5	12,096,765,336	2.48%	12	98.24%
UGX 1 billion > threshold > UGX 0.3 billion	6	3,758,581,237	0.77%	18	99.01%
UGX 0.3 billion > threshold > UGX 0.1 billion	15	2,654,612,394	0.54%	33	99.55%
UGX 0.1 billion > threshold > UGX 0.05 billion	14	951,549,164	0.19%	47	99.75%
UGX 0.05 billion > Threshold	138	1,233,521,335	0.25%	185	100.00%
<b>Total</b>	<b>185</b>	<b>488,380,524,372</b>	<b>100.00%</b>		

Following the consideration of various thresholds based on the payments made by the 185 entities identified as holding active mining licenses during the reporting period, we recommend that the reconciliation scope contain the 7 mining companies that made payments exceeding UGX 12 billion.

With regards to the remaining 178 mining entities excluded from the reconciliation scope, we recommend including them in the UGEITI report through unilateral disclosure by Government Entities in accordance with EITI Requirement 4.1.d. The list of mining entities making payments below the materiality threshold are detailed in Annex 5 of this report.

- (v) Based on the list of extractive entities recommended to be included in the reconciliation scope, we recommend including the following payment streams in the FY2020-21 reporting scope as follows:

**Table 3: List of payment flows retained in the reporting scope**

Payment flows	Extractive companies	Government Agencies
<b>Uganda Revenue Authority (URA)</b>		
1.1 PAYE	✓	✓

<sup>6</sup> Source: Data received from Petroleum Authority of Uganda (PAU).

Payment flows	Extractive companies	Government Agencies
1.2 Withholding - Foreign Trans	✓	✓
1.3 Withholding Tax	✓	✓
1.4 Withholding - Management Fees	✓	✓
1.5 Customs Payments	✓	✓
1.6 Value Added Tax	✓	✓

<b>Quasi-fiscal expenditure</b>		
7.1 Quasi-fiscal expenditure made by Uganda National Oil Company (UNOC)		✓

(vi) Based on the list of extractive entities and payment streams recommended to be included in the reporting scope, the government agencies that will be required to report for the FY 2020-21 UGEITI Report are as follows:

Oil and gas sector

**Table 4: List of Government Agencies within the oil and gas sector UGEITI reporting process**

N°	Government Agency	IA comment
1	Uganda Revenue Authority (URA)	Retained in the reconciliation scope
2	Uganda National Oil Company (UNOC)	Unilateral disclosure
3	Petroleum Authority of Uganda (PAU)	
4	Directorate of Petroleum (DoP)	
5	Uganda Registration Services Bureau (URSB)	

Mining sector

**Table 5: List of Government Agencies within the mining sector UGEITI reporting process**

N°	Government Agency	IA comment
1	Uganda Revenue Authority (URA)	Retained in the reconciliation scope
2	Directorate Of Geological Survey and Mines (DGSM)	Unilateral disclosure
3	Uganda Registration Services Bureau (URSB)	
4	Kilembe Mines Limited	

- (vii) In addition to the payment/receipt report listed above, reporting entities will be required to disclose other non-revenue information in accordance with the EITI requirements as summarised below:

**Table 5: List of non-revenue information**

Non-revenue information	EITI requirement Ref	Extractive companies	Government Agencies
Legal framework and fiscal regime	2.1		✓
Contract and license allocations	2.2		✓
Register of licenses	2.3		✓
Government's policy on disclosure of contracts and licenses	2.4		✓
Beneficial ownership	2.5	✓	✓
State participation in the extractive industries	2.6		✓
An overview of the extractive industries, including any significant exploration activities	3.1		✓
Production data	3.2	✓	✓
Export data	3.3	✓	✓
Distribution of revenues from the extractive industries	5.1		✓
Contribution of the extractive industries to the economy	6.3	✓	✓

A detailed list of non-revenue information to be included is presented in Section 4.6 of this report.

- (viii) In order to ensure the credibility of the figures reported by extractive entities and government agencies, we recommend that:
- the declarations made by companies and government agencies should be signed by an authorised senior officer (at management level) and an authorised senior official respectively;
  - government agencies: need to be requested to obtain a certification of the accuracy of the government's disclosures from their external auditor (Office of the Auditor General) as per the Terms of reference approved by UGEITI. This certification would ascertain that the figures reported in their Reporting Templates are complete and agree with the audited government accounts for the FY 2020-21, to meet EITI Requirements 4.9 that provides for an assessment of whether the revenues are subject to credible, independent audit, applying international auditing standards;
  - reporting templates submitted by extractive companies included in the scope should be certified by an External Auditor or the company's Statutory Auditor for each company; and
  - all reporting entities selected in the reporting scope would be required to submit their audited financial statements for the FY 2020-21.

## 3. APPROACH AND METHODOLOGY

### 3.1. Objective of the scoping report

The objective of this report is to define the reporting scope of UGEITI report for FY 2020-21 which will be submitted to the UGEITI MSG for approval.

The scope of EITI reporting is one of the key steps that the UGEITI MSG needs to consider before preparing UGEITI Report.

In order to be effective and compliant, EITI Reports must be timely, reliable and comprehensive. Defining the EITI scope is key in ensuring that the EITI Report meets these EITI Requirements. The scoping report involves:

- defining the tax reporting period;
- determining material revenue streams from each extractive sector (oil, gas and mining).
- deciding which extractive companies and government agencies would be included in the process;
- preparing the reporting template to be used by reporting entities; and
- proposing procedures to ensure credibility of the data submitted by reporting entities.

We conducted a preliminary analysis, in order to:

- obtain a good understanding of the extractive resources and industries of the country;
- consider the current auditing practices for companies and government agencies in the country;
- review existing data for the relevant period to determine significant revenue streams;
- define the materiality threshold for revenue streams to be covered in the EITI Report;
- identify extractive companies which make material payments within the scope of the agreed material revenue streams; and
- identify government agencies, including those at sub-national level, which collect material revenues within the scope of the agreed material revenue streams.

### 3.2. Data collection

In order to understand the size of Uganda's Extractive Industry and commercial practices, the tax systems and the payment flows as well as extractive companies and government agencies involved in this sector, we collected data on:

- legislation applicable to the extractive sectors;
- the structure of the extractive sectors in Uganda to establish the size and its main stakeholders;
- the statistics and financial indicators of the extractive sectors in terms of production and contribution to Uganda Government's total revenue collection; and
- all changes which took place during the reporting period with regards to legislation, new contracts or agreements that might impact the extractive sectors.

## 3.3. Methodology adopted

### 3.3.1. Review of the different background information and data

Our work included the review of the different data collected from government agencies including:

- ✓ a review of the payments and revenues to be covered in the second UGEITI Report in accordance with EITI Requirement 4 and to make recommendations and to indicate the UGEITI MSG'S decision on:
  - the definition of materiality and thresholds, and the resulting revenue streams to be included in accordance with Requirement 4.1(b);
  - the sale of the state's share of production or other revenues collected in-kind in accordance with Requirement 4.2;
  - the inclusion of infrastructure provisions and barter arrangements in accordance with Requirement 4.3;
  - the inclusion of social expenditure in accordance with Requirement 6.1;
  - the inclusion of transportation revenues in accordance with Requirement 4.4;
  - disclosure and reconciliation of payments to and from state owned enterprises in accordance with Requirement 2.6;
  - the materiality of direct sub-national payments and their inclusion in accordance with Requirement 4.6;
  - the materiality of sub-national transfers and their inclusion in accordance with Requirement 5.2;
  - the level of disaggregation in the EITI Report in accordance with Requirement 4.7; and
  - any other aspects as agreed by the MSG.
- ✓ A review of the companies and government agencies that are required to be included within the scope of the report in accordance with EITI Requirement 4.1 by:
  - identification of the companies that make material payments to the state in accordance with Requirement 4.1 (d);
  - identification of the government agencies that receive material payments in accordance with Requirement 4.1 (d);
  - identification of barriers to full government disclosure of total revenues received from each of the benefit streams agreed in the scope of the EITI Report, including revenues that fall below agreed materiality thresholds (Requirement 4.1 (b));
  - confirmation of UGEITI MSG's position on disclosure and reconciliation of payments to and from state owned enterprises in accordance with Requirement 4.5;
  - confirmation of UGEITI MSG's position on materiality of sub-national payments and their inclusion in accordance with Requirement 4.6; and
  - confirmation of UGEITI MSG's position on the materiality of sub-national transfers and their inclusion in accordance with Requirement 5.2.
- ✓ Advise the UGEITI MSG in examining the audit and assurance procedures of companies and government agencies participating in the EITI reporting process in accordance with Requirement 5.2 (b). This includes examining the relevant laws and regulations, any reforms that are planned or underway, and whether these procedures are in line with international standards.
- ✓ Advice given to the UGEITI MSG on the Reporting Templates based on the agreed benefit streams to be reported on and the reporting entities.
- ✓ Advise the UGEITI MSG on what information be provided to the IA by the companies and

government agencies selected within the scope to ensure credibility of the data in accordance with Requirement 5.2(c).

The main extractive sector covers two sub-sectors, namely: mining and petroleum.

### **3.3.2. Compilation of statistical data from the extractive industries**

In order to identify all payment flows as well as relevant entities in the mining, oil and gas sectors, we performed the following procedures:

- collection of the list of active licenses during the reporting period;
- obtained the revenue streams collected by the government from companies operating in the extractive sectors;
- consolidation of revenues collected by government agency, by type of flow and by company;
- calculation of the impact of the consolidated results from the materiality analysis; and
- preparation of the reporting template based on the results of the materiality analysis and in accordance with the requirements of the 2019 EITI Standard.

### **3.3.3. Preparation of the EITI scope**

The scoping report sets out the areas to be covered, the payment flows to be reported on, the extractive companies and the government agencies, which have been selected to submit a Reporting Template. In order to define the EITI scope, we performed the following:

- identified the scope of the extractive sector;
- calculated the materiality threshold for the reconciliation process;
- selected cash flows based on the provisions of EITI Requirements and the materiality threshold proposed in this scoping report;
- selected companies which should submit a Reporting Template based on the provisions of EITI Requirement 4.1 and Guidance Note 13 of the International Secretariat;
- determined which government agencies should submit a Reporting Template in accordance with EITI Requirement 4.1; and
- proposed Reporting Templates to be used as presented in Annex 6 of this report.

## 4. PROPOSED SCOPE

The Terms of Reference state that the purpose of the scoping report is to confirm the scope of the EITI reporting process, including the reporting templates and the data collection procedures for publishing the EITI Report.

In order to define the scope of the EITI reporting process and the data collection procedures, our work included a general understanding of the Extractive Sector in Uganda. We also consulted with government agencies in order to collect relevant information on the size of the petroleum and mining sectors and their respective contributions to government revenues, as part of the process to establish the prospective scope of the EITI report covering the FY 2020-21.

We have considered all information made available to us during our work.

### 4.1. Fiscal year (EITI Requirement 4.8)

Requirement 4.8 of the 2019 EITI Standard states that: 'Implementing countries are expected to publish regular and timely information in accordance with the EITI Standard and the agreed work plan (1.5) on an annual basis. The Multi-Stakeholder Group should agree on the accounting period covered by the EITI disclosures. B) The data must be no older than the second to last complete accounting period, e.g. information pertaining to the financial year 2019 must be published at the latest by 31 December 2021.'

We can confirm that the second EITI Report for Uganda relates to the FY 2020-21 which starts from 1 July 2020 to 30 June 2021.

### 4.2. Level of disaggregation (EITI Requirement 4.7)

Requirement 4.7 of the 2019 EITI Standard states that: 'It is required that EITI data is disaggregated by individual project, by company, by government agency and by revenue stream.

The reporting entities included in the reporting scope were asked to report their data:

- by administration or public entity for each company retained in the oil and gas sector reconciliation scope;
- by company (or taxpayer) for public entities included in the reporting scope;
- by type of flow for all reporting entities; and
- by project for all reporting companies.

Reporting entities will also be asked to report data on production and exports by project.

#### Definition of the term 'project'

According to Guidance Note 29 on project level reporting, the global practice in defining project shows that one of the key take-aways is that what constitutes a project is linked to the forms of legal agreement(s) governing extractive activities between the government and companies. In other words, in a production-sharing regime, a project is typically the contract that gives rise to payment liabilities. In a tax/royalty regime, a project is typically the license that gives rise to payments.

In Uganda, a project is defined as operational activities that are governed by a single agreement (contract, license, lease, concession, or similar legal agreement) and forms the basis for payment of liabilities with a government.

Substantially interconnected agreements are a set of operationally and geographically integrated contracts, licenses, leases or concessions or related agreements with substantially similar terms that

are signed with a government, giving rise to payment liabilities. Such agreements can be governed by a single contract, joint venture, production sharing agreement or other overarching legal agreements.

Where payments are attributed to a specific project, then the total amounts per type of payments shall be disaggregated by project. Where payments are levied at an entity level rather than at a project level, payments will be disclosed at an entity level rather than at a project level.

Hence, the reporting entities will be requested to disclose the license number for each of the payments detailed in Section 4.3.2.b. as well as the production and exports data.

The scoping report should indicate the MSG's decision on the level and type of disaggregation of EITI data in the second UGEITI report.

### **4.3. Payment flows (EITI Requirement 4.1)**

Requirement 4.1 (b) of the EITI Standard states that: "The multi-stakeholder group is required to agree which payments and revenues are material and which must therefore be disclosed, including appropriate materiality definitions and thresholds. Payments and revenues are considered material if their omission or misstatement could significantly affect the comprehensiveness of the disclosures. A description of each revenue stream, materiality definitions and thresholds should be disclosed. In establishing materiality definitions and thresholds, the multi-stakeholder group should consider the size of the revenue streams in relation to total revenues. The multi-stakeholder group should document the options considered and the rationale for establishing the definitions and thresholds."

Section 1.3.1 of the Terms of Reference requires that the preliminary analysis phase should indicate the MSG'S decision on the definition of materiality and threshold and the resulting revenue streams to be included in the report.

### 4.3.1. Oil and gas sector

#### 4.3.1.a. Tax and non-tax revenue streams' analysis (EITI Requirement 4.1.b)

During the scoping phase, we held meetings with government agencies which received cash flows from oil and gas companies. The receipts related to the extractive sector for the FY 2020-21 from Uganda Revenue Authority are set out in the table below:

**Table 6: Analysis of revenues collected from the oil and gas sector**

Government agencies	URA	NEMA	MEMD	MWE	UNMA	MWT	UNBS	MGLSD	URSB	Total receipts for FY 2020-21	Weight %
Withholding tax	60,686,549,124									60,686,549,124	40.55%
Paye	52,550,365,827									52,550,365,827	35.12%
VAT	32,450,068,111									32,450,068,111	21.68%
Training fee	1,592,016,320									1,592,016,320	1.06%
Environmental Impact Assessment		1,171,950,669			5,250,000					1,177,200,669	0.79%
Rental Fee			1,144,158,611							1,144,158,611	0.76%
Cash payment	28,261,596									28,261,596	0.02%
Permit				15,100,000						15,100,000	0.01%
Other tax	260,467	4,300,000	600,000	150,000			655,000	350,000	20,000	6,335,467	0.00%
Licence fee						1,100,000				1,100,000	0.00%
Stamp duty	125,000									125,000	0.00%
<b>Total</b>	<b>147,307,646,445</b>	<b>1,176,250,669</b>	<b>1,144,758,611</b>	<b>15,250,000</b>	<b>5,250,000</b>	<b>1,100,000</b>	<b>655,000</b>	<b>350,000</b>	<b>20,000</b>	<b>149,651,280,725</b>	<b>100.00%</b>

The Uganda Revenue Authority (URA) is responsible for collecting taxes from extractive entities. We propose including all revenue streams in the reconciliation scope of the oil and gas sector for FY 2020-21 without applying any materiality threshold.

#### 4.3.1.b. Payment streams specific to the oil and gas sector (EITI Requirement 4.1.c)

EITI Requirement 4.1.c states that the following revenue streams specific to the mining, oil and gas sectors should be included:

- Royalties;
- Bonuses, such as signature, discovery and production bonuses;
- License fees, rental fees, entry fees and other considerations for licenses and/or concessions; and
- any other significant payments and material benefits to government.

The oil and gas institutional framework includes the three institutions listed below which are responsible for the oil and gas activities in Uganda. These include<sup>7</sup>:

- the Directorate of Petroleum in the Ministry of Energy and Mineral Development (MEMD), which is responsible for policy formulation, investor promotion and licensing;
- the Petroleum Authority of Uganda (PAU), which regulates the sector; and
- the Uganda National Oil Company (UNOC) under whose remit lies the responsibility for the commercial aspects across the entire petroleum value chain.

During the scoping phase, we held meetings with these government agencies to identify revenue streams specific to the oil and gas sector to be included in the reconciliation scope. However, we note from the confirmations received that all oil and gas related revenues for the FY 2020-21 were collected by URA.

#### 4.3.2. Mining sector

During the scoping phase, we held meetings with several government agencies including URA and DGSM. We received the statement of revenues from URA which is a centralised government revenues collection agency. However, the table below details the payment flows by government agencies that levy them. The total amount collected for the FY 2020-21 from these government agencies is set out as follows:

**Table 7: Analysis of revenues collected from the mining sector**

Government agencies	URA	DGSM	NEMA	Total receipts for FY 2020-21	Weight %
VAT	232,256,936,171			232,256,936,171	47.56%
Income Tax	70,933,624,129			70,933,624,129	14.52%
Gross Payment Account	44,547,503,251			44,547,503,251	9.12%
Local Excise Duty	43,721,173,817			43,721,173,817	8.95%
Paye	29,735,092,705			29,735,092,705	6.09%
Withholding Tax	29,200,855,177			29,200,855,177	5.98%
Cash payment	24,296,153,762			24,296,153,762	4.97%
Royalty		7,298,795,548		7,298,795,548	1.49%
Other Tax	2,789,853,389			2,789,853,389	0.57%
Stamp Duty	1,702,637,282			1,702,637,282	0.35%
Licence Fee		1,215,895,000		1,215,895,000	0.25%

<sup>7</sup> Source : Data received from Uganda National Oil Company (UNOC).

Government agencies	URA	DGSM	NEMA	Total receipts for FY 2020-21	Weight %
Registration Fee	670,369,050			670,369,050	0.14%
Environmental Impact Assessment			11,635,091	11,635,091	0.00%
<b>Total</b>	<b>479,854,198,733</b>	<b>8,514,690,548</b>	<b>11,635,091</b>	<b>488,380,524,372</b>	<b>100.00%</b>

The statement of revenues collected from the mining sector detailed by payment flow is presented in Annex 2 of this report.

We propose including all revenue streams in the reconciliation scope of the mining sector for FY 2020-21 without applying any materiality threshold.

### 4.3.3. Common payment flows

The 2019 EITI Standard stipulates that certain revenue streams are common to the mining, oil and gas sectors and should therefore be included in the EITI report.

#### 4.3.3.a. Environmental expenditure by extractive companies (EITI Requirement 6.1)

EITI Requirement 6.1.d states that the MSG is encouraged to develop a reporting process where it agrees that discretionary environmental expenditure and transfers are material.

We recommend including data on mandatory and discretionary environmental expenditure in the reporting scope without applying any materiality threshold.

#### 4.3.3.b. Social expenditure by extractive companies (EITI Requirement 6.1)

The scoping report should indicate the UGEITI MSG'S decision on social expenditure in accordance with Requirement 6.1.

##### (i) Mandatory social contribution

EITI Requirement 6.1.a states that: 'material social expenditure incurred by companies must be disclosed where these are mandated by law or the contract with government.

We recommend including data on mandatory social expenditure (in cash and in kind) in the reporting scope without applying any materiality threshold.

##### (ii) Discretionary social expenditure

EITI Requirement 6.1.d states that the MSG is encouraged to develop a reporting process where it agrees that discretionary social expenditure and transfers are material.

We recommend including data on discretionary social expenditure in the reporting scope without applying any materiality threshold as follows:

**Table 8: Revenue streams relevant to discretionary social expenditure**

Discretionary social expenditure
Discretionary social expenditure (in cash)
Discretionary social expenditure (in kind)

#### 4.3.3.c. Sale of the state's share of production or other revenues collected in kind (EITI Requirement 4.2)

The 2019 EITI Standard states that: 'Where the sale of the state's share of production of oil, gas and/or mineral resources or other revenues collected in kind is material, the government, including state-owned enterprises, are required to disclose the volumes received and sold by the state (or third parties appointed by the state to sell on their behalf), the revenues received from the sale, and the revenues transferred to the state from the proceeds of oil, gas and minerals sold. Where applicable,

this should include payments (in cash or in kind) related to swap agreements and resource-backed loans.'

Section 1.3.1 of the Terms of Reference states that the scoping report should indicate the UGEITI MSG'S decision on the sale of the state's share of production or other revenues collected in kind in accordance with Requirement 4.2.

None of the government agencies confirmed receiving payments in kind from extractive entities during the FY 2020-21. However, we recommend that information on the state's share of production or other revenues collected in kind during the FY 2020-21 are included through unilateral disclosure by the relevant government agencies.

#### **4.3.3.d - Infrastructure provisions and Barter arrangements (EITI Requirement 4.3)**

The 2019 EITI Standard states that: 'The multi-stakeholder group is required to consider whether there are any agreements, or sets of agreements involving the provision of goods and services (including loans, grants and infrastructure works), in full or partial exchange for oil, gas or mining exploration or production concessions or physical delivery of such commodities. In order to meet this requirement, the multi-stakeholder group needs to gain a full understanding of: the terms of the relevant agreements and contracts, the parties involved, the resources which have been pledged by the state, the value of the balancing benefit stream (e.g. infrastructure works), and the materiality of these agreements relative to conventional contracts.

Where the multi-stakeholder group concludes that these agreements are material, it is required to ensure that EITI implementation addresses these agreements and disclosures provide a level of detail and disaggregation commensurate with the other payments and revenue streams. The multi-stakeholder group is required to agree a procedure to address data quality and assurance of the information set out above, in accordance with Requirement 4.9.'

Section 1.3.1 of the Terms of Reference states that the scoping report should indicate the UGEITI MSG'S decision on the coverage of infrastructure provisions and barter arrangements in accordance with Requirement 4.3.

We propose including information on the infrastructure provisions and barter arrangements through the reporting process from government agencies and extractive companies included in the reporting scope.

#### **4.3.3.e - Transportation revenues (Requirement 4.4)**

Requirement 4.4 of the 2019 EITI Standard stipulates that where revenues from the transportation of oil, gas and minerals are material, the government, and state-owned enterprises (SOE) are expected to disclose the revenues received. The information to be disclosed may include:

- i. a description of the transportation arrangements including: the product; transportation route(s); and the relevant companies and government entities, including SOE(s), involved in the transportation;
- ii. definitions of the relevant transportation taxes, tariffs or other relevant payments, and the methodologies used to calculate them;
- iii. disclosure of tariff rates and volume of the commodities being transported; and
- iv. disclosure of revenues received by government entities and SOE(s), in relation to transportation of oil, gas and minerals.'

Section 1.3.1 of the Terms of Reference states that the scoping report should indicate the UGEITI MSG'S decision on the coverage of the transportation revenues in accordance with Requirement 4.4.

We propose including information on transportation arrangements that have been into force during the FY 2020-21 through unilateral disclosure by the relevant government agencies.

#### **4.3.3.f - Subnational payments (EITI Requirement 4.6)**

The 2019 EITI Standard states that: ‘It is required that the multi-stakeholder group establishes whether direct payments (within the scope of the agreed benefit streams) from companies to sub-national government entities are material. Where these payments are material, the multi-stakeholder group must ensure that these payments and their receipt are disclosed.’

The multi-stakeholder group is required to agree a procedure to address data quality and assurance of information on sub-national payments, in accordance with Requirement 4.9.’

Section 1.3.1 of the Terms of Reference states that the scoping report should indicate UGEITI MSG’s decision on the materiality and inclusion of direct sub-national payments.

We propose including information on payments to sub-national government agencies through the reporting process from government agencies and extractive companies included in the reporting scope.

#### **4.3.3.g - Sub-national transfers (EITI Requirement 5.2)**

The 2019 EITI Standard states that: ‘Where transfers between national and sub-national government entities are related to revenues generated by the extractive industries and are mandated by a national constitution, statute or other revenue sharing mechanism, the multi-stakeholder group is required to ensure that material transfers are disclosed. Implementing countries should disclose the revenue sharing formula, if any, as well as any discrepancies between the transfer amount calculated in accordance with the relevant revenue sharing formula and the actual amount that was transferred between the central government and each relevant subnational entity. The multi-stakeholder group is encouraged to agree a procedure to address data quality and assurance of information on sub-national transfers, in accordance with Requirement 4.9. Where there are constitutional or significant practical barriers to the participation of sub-national government entities, the multi-stakeholder group may seek adapted implementation in accordance with Article 1 of the EITI Board’s procedures for oversight of EITI implementation in section 4 of the 2019 EITI Standard.’

Section 1.3.1 of the Terms of Reference stipulates that the scoping report should indicate the UGEITI MSG’s decision on the materiality and inclusion of direct sub-national transfers in accordance with Requirement 5.2 of the EITI Standard.

We propose including information on direct sub-national transfers through unilateral disclosure by the relevant government agencies.

#### **4.3.3.h - Quasi-fiscal expenditure (EITI Requirement 6.2)**

Requirement 6.2 of the EITI Standard states that: ‘Where state participation in the extractive industries gives rise to material revenue payments, implementing countries must include disclosures from SOEs on their quasi-fiscal expenditure. The multi-stakeholder group is required to develop a reporting process with a view to achieving a level of transparency commensurate with other payments and revenue streams and should include SOE subsidiaries and joint ventures.’

Quasi-fiscal expenditure include arrangements whereby SOEs undertake public social expenditure such as payments for social services, public infrastructure, fuel subsidies and national debt servicing, etc. outside of the national budgetary process. Implementing countries and multi-stakeholder groups may wish to take the IMF’s definition of quasi-fiscal expenditure into account when considering whether such expenditures are considered quasi-fiscal.’

Section 1.3.5 of the Terms of Reference states that the IA shall report the quasi-fiscal expenditure of SOE(s) such as payments for social services, public infrastructure, fuel subsidies and national debt servicing.

We recommend including information on the quasi-fiscal expenditure during the FY 2020-21 through unilateral disclosure by Uganda National Oil Company (UNOC), the wholly owned government company. Information on quasi-fiscal expenditure should include arrangements whereby UNOC undertook public social expenditure such as payments for social services, public infrastructure, fuel subsidies and national debt servicing, etc. outside of the national budgetary process.

#### 4.3.3.i - Other payment flows (EITI Requirement 4.1.c)

EITI Requirement 4.1.c states that ‘any revenue streams or benefits should only be excluded where they are not applicable or where the multi-stakeholder group agrees that their omission will not materially affect the comprehensiveness of the government and company disclosures.’

In order to avoid any omissions of material payment flows, we propose to add a separate line entitled “Any other payment flows” in the reporting template for government agencies to report any such payments.

#### 4.3.4. Financial flows to be included in the UGEITI Report for the FY 2020-21

Following the above analysis, we set out below the summary of payment flows that we propose to be included in the oil and gas sector EITI reconciliation scope for FY 2020-21:

**Table 9: Revenue streams retained in the reconciliation scope**

Payment flows	Extractive companies	Government Agencies
<b>Uganda Revenue Authority (URA)</b>		
1.1 PAYE	✓	✓
1.2 Withholding - Foreign Trans	✓	✓
1.3 Withholding Tax	✓	✓
1.4 Withholding - Management Fees	✓	✓
1.5 Customs Payments	✓	✓
1.6 Value Added Tax	✓	✓
1.7 Income Tax	✓	✓
1.8 Capital gain	✓	✓
1.9 Environmental Impact Assessment	✓	✓
1.10 Royalties	✓	✓
1.11 Licenses Fees	✓	✓
1.12 Annual mineral rents	✓	✓
1.13 Other payment flows	✓	✓
<b>Social expenditure</b>		
3.1 Mandatory social expenditure	✓	✓
3.2 Discretionary social expenditure	✓	
<b>Environmental expenditure</b>		
4.1 Mandatory environmental expenditure	✓	✓
4.2 Discretionary environmental expenditure	✓	
<b>Infrastructure provisions and Barter arrangements</b>		
5.1 Value of the benefit stream during the fiscal year 2020-21	✓	✓
<b>Subnational payments</b>		
6.1 Any payment made to regional authority	✓	-
<b>Quasi-fiscal expenditure</b>		
7.1 Quasi-fiscal expenditure made by Uganda National Oil Company (UNOC)		✓

## 4.4. Extractive Companies (EITI Requirement 4.1)

EITI Requirement 4.1 (b) of the EITI Standard states that: ‘All oil, gas and mining companies making material payments to the government are required to comprehensively disclose these payments in accordance with the agreed scope. A company should only be exempted from disclosure if it can be demonstrated that its payments are not material.’

### 4.4.1. Oil and gas sector

We propose that all four (4)<sup>8</sup> oil and gas companies present in the country and which held active licenses in the fiscal year 2020-21 are included in the reconciliation scope without considering any materiality threshold. Uganda National Oil Company (UNOC) holds 15%<sup>9</sup> participating interest as the Government’s Nominee in the Petroleum Production Licenses and did not make any payment to other government agencies out of the upstream sector.

Table 10: List of oil and gas entities retained in the reconciliation scope

N°	TIN <sup>10</sup>	Name of Petroleum Company(ies)	Reconciliation scope
1	1000171284	TOTAL Energies E&P UGANDA B.V.	✓
2	1000491360	CNOOC UGANDA LTD	✓
3	1013866034	ORANTO PETROLEUM LTD	✓
4	1013940113	ARMOUR ENERGY LTD	✓

### 4.4.2. Mining sector

Based on the data provided by URA and DGSM, the payments for the mining sector during FY 2020-2021 are set out in the following table

Table 11: Summary of materiality analysis for the mining sector

Thresholds	Number of entities	Total receipts for FY 2020-21	Total %	Cumulative number of entities	Cumulative %
Threshold > UGX 200 billion	1	273,032,167,053	55.91%	1	55.91%
UGX 200 billion > threshold > UGX 30 billion	2	125,851,236,255	25.77%	3	81.67%
UGX 30 billion > threshold > UGX 15 billion	2	44,231,516,019	9.06%	5	90.73%
UGX 15 billion > threshold > UGX 12 billion	2	24,570,575,579	5.03%	7	95.76%
UGX 12 billion > threshold > UGX 1 billion	5	12,096,765,336	2.48%	12	98.24%
UGX 1 billion > threshold > UGX 0.3 billion	6	3,758,581,237	0.77%	18	99.01%
UGX 0.3 billion > threshold > UGX 0.1 billion	15	2,654,612,394	0.54%	33	99.55%
UGX 0.1 billion > threshold > UGX 0.05 billion	14	951,549,164	0.19%	47	99.75%
UGX 0.05 billion > Threshold	138	1,233,521,335	0.25%	185	100.00%
<b>Total</b>	<b>185</b>	<b>488,380,524,372</b>	<b>100.00%</b>		

The above table shows that the companies making payments of more than **UGX 12,000,000,000** represent **95.76%** of the total revenues collected by Government Entities from entities operating in the

<sup>8</sup> Source: Data received from Petroleum Authority of Uganda (PAU).

<sup>9</sup> Source: Data received from Uganda National Oil Company (UNOC).

<sup>10</sup> Source: Data received from Uganda Revenue Authority (URA).

mining sector. The detailed list of contributions to the total extractive sector revenues by company is presented in Annex 3.

Accordingly, we recommend that the following 7 mining entities are selected for the reconciliation exercise on the basis of the data obtained from URA and DGSM:

**Table 12: List of mining entities retained in the reconciliation scope**

N°	Company
1	Tororo Cement Ltd
2	Hima Cement Ltd
3	National Cement Company Uganda Ltd
4	Kampala Cement Co. Ltd
5	Goodwill Ceramic Co.Ltd
6	Wagagai Mining U Ltd
7	Mota Engil Engenharia E Construcao Africa, Sa

## 4.5. Government Agencies (EITI Requirement 4.1)

Requirement 4.1 (b) of the EITI Standard states that: “Implementing countries must ensure that all government agencies receiving material revenues from oil, gas and mining companies are required to comprehensively disclose these revenues in accordance with the agreed scope. Government agencies should only be exempted from disclosure if it can be demonstrated that their revenues are not material.”

### 4.5.1. Oil and gas sector

Based on the oil and gas reconciliation scope proposed above, the government agencies that will be required to report for the FY 2020-21 UGEITI Report are :

**Table 13: List of Government Agencies within the oil and gas sector UGEITI reporting process**

N°	Government Agency	IA comment
1	Uganda Revenue Authority (URA)	Retained in the reconciliation scope
2	Uganda National Oil Company (UNOC)	Unilateral disclosure
3	Petroleum Authority of Uganda (PAU)	
4	Directorate of Petroleum (DoP)	
5	Uganda Registration Services Bureau (URSB)	

## 4.5.2. Mining sector

For government agencies which collected revenues from the mining sector, we recommend disclosing the benefit streams through unilateral disclosure by the government agencies listed in the table below.

Table 14: List of Government Agencies within the mining sector UGEITI reporting process

N°	Government Agency	IA comment
1	Uganda Revenue Authority (URA)	Retained in the reconciliation scope
2	Directorate Of Geological Survey and Mines (DGSM)	
3	Uganda Registration Services Bureau (URSB)	Unilateral disclosure
4	Kilembe Mines Limited	

## 4.6. Non-revenue information

The non-revenue information to be provided in the UGEITI report for the FY 2020-21 as required by the 2019 EITI Standard and as stated in Table 1 of the Terms of Reference is provided below.

### 4.6.1. Legal framework and fiscal regime (EITI Requirement 2.1)

Requirement 2.1 of the 2019 EITI Standard stipulates that: ‘Implementing countries must disclose a description of the legal framework and fiscal regime governing the extractive industries. This information must include a summary description of the fiscal regime, including the level of fiscal devolution, an overview of the relevant laws and regulations, a description of the different types of contracts and licenses that govern the exploration and exploitation of oil, gas and minerals, and information on the roles and responsibilities of the relevant government agencies. ‘Where the government is undertaking reforms, the multi-stakeholder group is encouraged to ensure that these are documented.’

We propose to include the description of the legal framework and fiscal regime which governed the extractive sector during the FY 2020-21 by detailing the following information:

- a summary description of the fiscal regime governing the oil and gas and mining sectors during the FY 2020-21 as well as documenting any reforms being undertaken;
- the level of fiscal devolution in Uganda for the oil and gas and mining sectors;
- an overview of the laws and regulations that were in force during the FY 2020-21 and governing the mining and oil and gas sectors;
- a description of the different types of contracts and licenses that govern the exploration and exploitation of oil, gas and minerals; and
- the institutional framework detailing the roles and responsibilities of the relevant government agencies governing the extractive sectors.

We also recommend that the UGEITI report for FY 2020-21 includes references to publicly available information regarding the legal framework and fiscal regime governing the extractive industries on the websites of the relevant government agencies.

#### 4.6.2. Contract and license allocations (Requirement 2.2)

Requirement 2.2 of the 2019 EITI Standard states that: ‘Implementing countries are required to disclose the following information related to all contract and license awards and transfers taking place during the accounting period covered by the most recent EITI disclosures, including for companies whose payments fall below the agreed materiality threshold:

- i. A description of the process for transferring or awarding the license;
- ii. The technical and financial criteria used;
- iii. Information about the recipient(s) of the license that has been transferred or awarded, including consortium members where applicable; and
- iv. Any material deviations from the applicable legal and regulatory framework governing license transfers and awards.

In cases where governments can select different methods for awarding a contract or license (e.g. competitive bidding or direct negotiations), the description of the process for awarding or transferring a license could include an explanation of the rules that determine which procedure should be used and why a particular procedure was selected.

Where there are gaps in the publicly available information, these should be clearly identified. Any significant legal or practical barriers preventing comprehensive disclosure of the information set out above should be documented and explained, including an account of government plans to overcome such barriers and the anticipated timescale for achieving them.’

We propose to include the following information for the mining and petroleum licenses as well as minerals and petroleum contracts awarded during the FY 2020-21 through unilateral disclosure by government agencies:

- a description of the allocation process of the license/contract transferred or awarded during the FY 2020-21;
- the technical and financial criteria used for transferring or awarding these licences/contracts during the FY 2020-21;
- information about the recipients of the licenses/contracts that have been transferred or awarded during the FY 2020-21; and
- any material deviations from the applicable legal framework into force during the FY 2020-21.

#### 4.6.3. Register of licenses (EITI Requirement 2.3)

Requirement 2.3 of the 2019 EITI Standard states that: ‘Implementing countries are required to maintain a publicly available register or cadastre system(s) with the following timely and comprehensive information regarding each of the licenses pertaining to companies within the agreed scope of EITI implementation:

- i. License holder(s).
- ii. Where collated, coordinates of the licensed area. Where coordinates are not collated, the government is required to ensure that the size and location of the licensed area are disclosed in the license register and that the coordinates are publicly available from the relevant government agency without unreasonable fees and restrictions. The disclosures should include guidance on how to access the coordinates and the cost, if any, of accessing the data. The government should also

document plans and timelines for making this information freely and electronically available through the license register.

iii. Date of application, date of award and duration of the license.

iv. In the case of production licenses, the commodity being produced. It is expected that the license register or cadastre includes information about licenses held by all entities, including companies and individuals or groups that are outside the agreed scope of EITI implementation, i.e. where their payments fall below the agreed materiality threshold. Any significant legal or practical barriers preventing such comprehensive disclosure should be documented and explained, including an account of government plans for seeking to overcome such barriers and the anticipated timescale for achieving them.

The term ‘license’ in this context refers to any license, lease, title, permit, contract or concession by which the government confers on a company(ies) or individual(s) rights to explore or exploit oil, gas and/or mineral resources.’

We recommend that the register of active licenses relating to FY 2020-21 is disclosed in the second UGEITI report by government agencies namely the Petroleum Authority of Uganda (PAU) and the Directorate of Petroleum and the Directorate of Geological Survey and Mines (DGSM).

#### **4.6.4. Government’s policy on disclosure of contracts and licenses (EITI Requirement 2.4)**

Requirement 2.4 of the 2019 EITI Standard states that: ‘It is a requirement to document the government’s policy on disclosure of contracts and licenses that govern the exploration and exploitation of oil, gas and minerals.’

We propose including the government’s policy on disclosure of contracts and licenses governing the mining and oil and gas sectors through disclosure by government agencies namely the Petroleum Authority of Uganda (PAU), the Directorate of Petroleum and the Directorate of Geological Survey and Mines (DGSM).

#### **4.6.5. Beneficial ownership (EITI Requirement 2.5)**

Requirement 2.5 of the 2019 EITI Standard states that: ‘It is recommended that implementing countries maintain a publicly available register of the beneficial owners of the corporate entity(ies) that apply for or hold a participating interest in an exploration or production oil, gas or mining license or contract, including the identity(ies) of their beneficial owner(s), the level of ownership and details about how ownership or control is exerted. Where possible, beneficial ownership information should be incorporated in existing filings by companies to corporate regulators, stock exchanges or agencies regulating extractive industry licensing. Where this information is already publicly available, the EITI Report should include guidance on how to access this information.

Implementing countries are required to document the government’s policy and multi-stakeholder group’s discussion on disclosure of beneficial ownership. This should include details of the relevant legal provisions, actual disclosure practices and any reforms that are planned or underway related to beneficial ownership disclosure.

As of 1 January 2020, it is required that implementing countries request, and companies publicly disclose, beneficial ownership information. This applies to corporate entity(ies) that apply for or hold a participating interest in an exploration or production oil, gas or mining license or contract and should include the identity(ies) of their beneficial owner(s), the level of ownership and details about how ownership or control is exerted. Any significant gaps or weaknesses in reporting on beneficial

ownership information must be disclosed, including naming any entities that failed to submit all or parts of the beneficial ownership information. Where a country is facing constitutional or significant practical barriers to the implementation of this requirement by 1 January 2020, the country may seek adapted implementation in accordance with Article 1 of the EITI Board's procedures for oversight of EITI implementation in section 4.

We recommend that the information on legal ownership is included through the reporting process of government agencies and extractive companies included in the reporting scope.

We also recommend including the following information on beneficial ownership of companies operating in the mining, oil and gas sector through disclosure by extractive companies included in the reporting scope:

- the name of the beneficial owner;
- the nationality of the beneficial owner;
- the country of residence of the beneficial owner;
- identifying any politically exposed persons who are beneficial owners; and
- the national identity numbers, dates of birth, residential or service addresses, and means of contact of beneficial owners.

We further recommend that the UGEITI MSG provides information on the government's policy on disclosure of beneficial ownership as provided in Table 1 of the Terms of reference.

#### **4.6.6. State participation in the extractive industries (EITI Requirement 2.6)**

Requirement 2.6 of the 2019 EITI Standard states that: 'Where state participation in the extractive industries gives rise to material revenue payments, implementing countries must disclose:

- i. An explanation of the role of state-owned enterprises (SOEs) in the sector and prevailing rules and practices regarding the financial relationship between the government and SOEs, i.e. the rules and practices governing transfers of funds between the SOE(s) and the state, retained earnings, reinvestment and third-party financing. This should include disclosures of transfers, retained earnings, reinvestment and third-party financing related to SOE joint ventures and subsidiaries. For the purpose of EITI implementation, a state-owned enterprise (SOE) is a wholly or majority government-owned company that is engaged in extractive activities on behalf of the government. Based on this, the multi-stakeholder group is encouraged to discuss and document its definition of SOEs, taking into account national laws and government structures.
- ii. Disclosures from the government and SOE(s) of their level of ownership in mining, oil and gas companies operating within the country's oil, gas and mining sector, including those held by SOE subsidiaries and joint ventures, and any changes in the level of ownership during the reporting period.

SOEs are expected to publicly disclose their audited financial statements, or the main financial items (i.e. balance sheet, profit/loss statement, cash flows), where financial statements are not available.

Implementing countries are encouraged to describe the rules and practices related to SOEs' operating and capital expenditure, procurement, sub-contracting and corporate governance, e.g. composition and appointment of the Board of Directors, Board's mandate and code of conduct.'

Uganda National Oil Company (UNOC) holds 15% participating interest on behalf of the Government's (as Nominee) in Petroleum Production Licenses awarded resulting in oil and gas discoveries.

We recommend that information on the state's participation in the extractive sector during the fiscal year 2020-21 is included through unilateral disclosure by government agencies namely UNOC. This information on the state participation should include:

- an explanation of UNOC's role in the oil and gas sector;
- the prevailing rules and practices regarding the financial relationship between UNOC and the other government agencies including the transfers of funds between UNOC and the other government agencies; and
- their level of ownership in oil and gas companies operating within Uganda, including those held by SOE subsidiaries and joint ventures, and any changes in the level of ownership during the reporting period.

#### **4.6.7. An overview of the extractive industries, including any significant exploration activities (EITI Requirement 3.1)**

In accordance with Requirement 3.1 of the 2019 EITI Standard, implementing countries should disclose an overview of the extractive industries including any significant exploration activities.

We propose to include an overview of the extractive industries including significant exploration activities in the second UGEITI Report through unilateral disclosure from the relevant government agencies which are the Petroleum Authority of Uganda (PAU), the Uganda National Oil Company (UNOC) as well as the Directorate of Petroleum and Directorate Of Geological Survey and Mines (which falls under the Ministry of Energy & Mineral Development).

Provided that EITI disclosure requirements can be met by referring to publicly available information and/or data collected as part of EITI implementation (i.e. Third section of the 2019 EITI Standard), we also recommend that the second UGEITI report includes references to publicly available information from the websites of the relevant government agencies, cited above.

#### **4.6.8. Production data (EITI Requirement 3.2)**

The 2019 EITI Standard states that: 'Implementing countries must disclose timely production data, including production volumes and values by commodity. This data could be further disaggregated by region, company or project, and include sources and the methods for calculating production volumes and values.'

We propose including production data by commodity and by volume and value, disaggregated by region/area through the reporting process from government agencies and extractive companies included in the reporting scope.

We also recommend that the second UGEITI report includes references to publicly available production data from the websites of the relevant government agencies involved in the extractive sector.

#### **4.6.9. Export data (EITI Requirement 3.3)**

Requirement 3.3 of the 2019 EITI Standard states that: 'Implementing countries must disclose timely export data, including export volumes and the values by commodity. This data could be further disaggregated by region, company or project, and include sources and the methods for calculating export volumes and values.'

We recommend that export data by commodity and by volume, value, and disaggregated by destination during the FY 2020-21 are included through the reporting process from government agencies and extractive companies included in the reporting scope.

We also recommend that the second UGEITI report includes references to publicly available export data from the websites of the relevant government agencies involved in the extractive sector.

#### **4.6.10. Distribution of revenues from the extractive industries (EITI Requirement 5.1)**

The 2019 EITI Standard states that: ‘Implementing countries must disclose a description of the distribution of revenues from the extractive industries.

Implementing countries should indicate which extractive industry revenues, whether cash or in-kind, are recorded in the national budget.

Where revenues are not recorded in the national budget, the allocation of these revenues must be explained, with links provided to relevant financial reports as applicable, e.g. sovereign wealth and development funds, sub-national governments, state-owned enterprises and other extra-budgetary entities.’

We propose that a description of the distribution of revenues from extractive companies through unilateral disclosure by the government agencies collecting revenues specific to the mining, oil and gas sectors is included within the second UGEITI Report.

Given that EITI disclosure requirements can be met by referencing publicly available information and/or data collected as part of EITI implementation (Third section of the 2019 EITI Standard), we also recommend including in the UGEITI report references to publicly available information from the relevant government agencies’ websites.

#### **4.6.11. Contribution of the extractive industries to the economy (EITI Requirement 6.3)**

Requirement 6.3 of the 2019 EITI Standard states that: ‘Implementing countries must disclose, when available, information about the contribution of the extractive industries to the economy for the fiscal year covered by EITI implementation. It is required that this information includes: The size of the extractive industries in absolute terms and as a percentage of GDP as well as an estimate of the informal sector activity, including but not necessarily limited to:

- artisanal and small-scale mining;
- total government revenues generated by the extractive industries (including taxes, royalties, bonuses, fees and other payments) in absolute terms and as a percentage of total government revenues;
- exports from the extractive industries in absolute terms and as a percentage of total exports;
- employment in the extractive industries in absolute terms and as a percentage of the total employment.

The information should be disaggregated by gender and, when available, further disaggregated by company and occupational level; Key regions/areas where production is concentrated.’

We recommend including the following macroeconomic information for the FY 2020-21 through unilateral disclosure by government agencies:

- the size of the mining, oil and gas sectors in absolute terms and as a percentage of GDP;
- an estimate of informal sector activities of the mining sectors including artisanal and small-scale mining;

- total government revenues generated by the mining, oil and gas sectors in absolute terms and as a percentage of total government revenues;
- exports from the mining, oil and gas sectors in absolute terms and as a percentage of total exports;
- employment in the extractive industries in absolute terms and as a percentage of total employment, by disaggregating the data by gender and by company and occupational level when available; and
- key regions/areas where production is concentrated for mining, oil and gas sectors.

We also recommend including in the second UGEITI report references to publicly available macroeconomic information from the websites of the relevant government agencies that are involved in the extractive sector as well as from that of the Uganda Bureau of Statistics (UBOS).

We further recommend including data relevant to production, exports and employment through disclosure by the extractive companies included in the reporting scope.

#### **4.7. Reliability and Assurance of data to be reported**

The multi-stakeholder group is required to agree a procedure to address data quality and assurance based on a standard procedure endorsed by the EITI Board. The multi-stakeholder group is required to apply the standard procedure without any material deviations. Should the multi-stakeholder group wish to deviate from the standard procedures, approval from the EITI Board must be sought in advance. The request from the multi-stakeholder group should address: (i) the rationale for deviating from the standard procedure; (ii) whether there is routine disclosure of the data required by the EITI Standard in requisite detail; (iii) whether the financial data is subject to credible, independent audit, applying international standards, and (iv) whether there is sufficient retention of historical data.’

In order to comply with Requirements 4.9, 4.3, 4.4, 4.6, 5.2.b of the 2019 EITI Standard, we recommend that the UGEITI MSG agrees on a procedure to address data quality and assurance of information submitted by reporting entities.

To ensure that EITI data submitted by reporting entities are subject to credible, independent audits, applying international auditing standards as well as to ensure the quality of data reported by reporting entities, we recommend the following approach with regards to the reporting process by government agencies and extractive companies included in the UGEITI reporting process:

- the declarations made by companies and government agencies should be signed by an authorised senior officer (at management level) and an authorised senior official respectively;
- government agencies: should obtain certification of their reporting templates from the Office of the Auditor General (OAG). This would ascertain that the figures reported in their Reporting Templates are complete and agree with the audited accounts for the FY 2020-21;
- Reporting templates submitted by extractive companies included in the reporting scope should be certified by an External Auditor or a Statutory Auditor for each company: the auditor may be the statutory auditor of the company or another auditor appointed for the occasion; and
- All reporting entities selected in the reporting scope would be required to submit their audited financial statements for the FY 2020-21.

Any changes to the information provided on the original data collection templates, supporting documents and/or confirmation from reporting entities will have to be made available to the Independent Administrator.

## ANNEXES

## Annex 1: Register of licenses in mining sector, active during fiscal year 2020-21

(\*) Tullow Uganda Ltd, Total E&P Uganda B. V and CNOOC Uganda Limited all had equal interest/stake in the exploration areas. However, in April 2020, Tullow agreed the sale of its assets in Uganda to Total E&P Uganda B. V with an effective date of 1 January 2020 and the deal completed on 10 November 2020. Prior to the sale, each party owned 33.3 percent in each license

## Annex 6: Reporting templates

### 1. Identification sheet

Full legal name of the company			
Legal Status			
Incorporation date			
Tax Payer Identification Number (TPIN)			
Company's Share Capital (in UGX)			
Company's registered Address			
		<b>Oil &amp; Gas extraction/exploration</b>	
Company activity	Activity	Activity type	% of the turnover
	Extractive activity		
	Others activity 1		
	Others activity 2		
	Total		0%

If no exact figures the company should mention an estimation

**Other than extractive**

**Other than Extractive**

*Please feel free to add rows*

*Total should be 100%*

Licence details	Licence number or Blocks awarded	Type	Issue date	Duration	Status	Mining Scale

Reporting template prepared by		Position	
Email address		Tel.	

Please state if the FY 2019-20 financial statements have been audited (yes/no)	
Name of the last financial statements Auditor	

	Yes/No	Company's comment
<b>Environmental and Social impact assessment</b>  Has the company submitted a follow-up or a report on the completion of the environmental and social impact assessment during FY 2020-21 ?		

## 2. Summary Reporting Template

Ref.	Type of payment/Revenue	Amount		Comments
		Paid to government agencies	Amount (UGX)	
<b>Uganda Revenue Authority (URA)</b>				
1.1	PAYE			
1.2	Withholding - Foreign Trans			
1.3	Withholding Tax			
1.4	Withholding - Management Fees			
1.5	Customs Payments			
1.6	Value Added Tax			
1.7	Income Tax			
1.8	Capital gain			
1.9	Environmental Impact Assessment			
1.10	Royalties			
1.11	Licenses Fees			
1.12	Annual mineral rents			
1.13	Other payment flows			
<b>Social expenditure</b>				
3.1	Mandatory social expenditure	-		
3.2	Discretionary social expenditure	-		
<b>Environmental expenditure</b>				
4.1	Mandatory environmental expenditure			
4.2	Discretionary environmental expenditure			
<b>Infrastructure provisions and Barter arrangements</b>				
5.1	Value of the benefit stream during the fiscal year 2020-21	-		
<b>Subnational payments</b>				
6.1	Any payment made to regional authority	-	-	

## 3. Payment flow details (by receipt number)

Payment Type / tax name	Government Agency (recipient)	Date of receipt	Receipt No.	Amount in (UGX)	Licence	Comments if any
<b>Total</b>				0
